

# PARAPET GRABBER

*Ideal for temporary parapet guardrails.*

Save time, labor, and money by using **THE DESLAURIERS PARAPET GRABBER** to quickly erect guard railing on parapet walls. Parapet Grabbers are designed to provide fall protection for people who are working at height. Parapet Grabbers are appropriate for concrete construction and parapet clamps for rooftop construction. Parapet Grabbers can be attached to parapet walls up to 25" in thickness.

Adjust to 25" easily by using a 7/8 socket or built in handle. The detachable steel safety base uses double 2x4s to create a strong vertical post to attach 2x4 or 2x6 railings. Detachable safety base can be used on other applications.

- Rugged steel construction with internal 1/2" coil rod for positive grip on slab.
- Handle for fast adjustment.
- Requires 20ft/lbs of torque to secure Parapet Grabber.
- Modular construction for easy installation and versatility.
- Maximum spacing of eight feet per OSHA spec.
- Meets all applicable OSHA and ANSI standards.

→ Detachable Steel Safety Base (Included)

→ Easily adjustable. Use fast adjusting handle or nut for positive socket/wrench adjusting.

*Installation:* Since the use and installation of the Deslauriers' Parapet Grabber is beyond the knowledge and control of Deslauriers, the proper use of these products is the responsibility of the user. The user should be familiar with the appropriate codes and safety regulations.
