

PLASTIC END CAPS

PLASTIC END CAPS are designed to fit the ends of round void forms, used in cast-in-place and precast slabs. Pricing per carton.

Standard sizes fit the following round fiber voids:

CAT#:	Fiber Void Size:	Package Size:
PEC8	8" od	100
PEC10	10" od	100
PEC10-1/2	10-1/2 od	100
PEC12	12" od	80
PEC12-1/2	12-1/2 od	80

*Custom sizes are available

FREQUENTLY ASKED QUESTIONS:

1. Will PEC's fit standard column for tubes such as Sonotube?

Yes, the PEC 10-1/2" will fit a standard wall 10" Sonotube and a PEC 12-1/2" will fit a standard wall 12" Sonotube.

2. Do the PEC's have to be stapled to the voids?

It is recommended the PEC's be stapled in three places. While they fit the voids, there is the possibility of the PEC's becoming dislodged during handling, shipping, and installation. even though the voids are normally vented, the heat of the hydration could build up and cause/create pressure to push the ends of the void.

3. Are other sizes available?

Yes! Deslauriers can custom fabricate or custom mold other sizes.
