

THE *ONLY* BIO-DEGRADABLE TEST CYLINDER ON EARTH

ENGINEERED TO BIO-DEGRADE IN A LANDFILL!

Bio-degradable & Recyclable

Plastics in landfills have been a problem for many years. Deslauriers has tackled this problem by placing additives in our concrete test molds to help them biodegrade. Our test molds can only biodegrade in active landfills.

patent#: 12/006.548

- Shelf life is not affected. Molds will not break down in a normal environment.
- BIO-CYLINDER™ test cylinder molds meet ASTM specifications C31, C192 and C470.
- Available in 6x12, 4x8, 3x6 and 2x4.
- Mold is non-absorptive and is a molded single unit for consistent dimensional uniformity.
- Smooth molded plastic allows quick, easy stripping.
- Strong, durable BIO-CYLINDER™ is weather resistant, eliminating job-site storage problems.
- Custom colors available.
- Test Cylinder Lids are also Bio-degradable.
