

# GROUT PRISM LINERS & SPACERS

**THE GROUT PRISM LINER (GPL)** utilizes a thin corrugated paper based upon the patented engineered design in the Deslauriers GSB. The proven slotted surface allows moisture to pass through the block.

- Designed and manufactured to meet the specific requirements of ASTM C1019 (Standard Test Method for Sampling and Testing Grout).
- Pre-assembled Grout Prism Liner is 3-1/2" square x 7-3/4" high. With the 3/4" plastic Prism Spacer, it forms a consistent 2:1 length to width ratio.
- The modular design of the Grout Prism Liner allows for fast setup of the C1019 pinwheel forming method, saving labor and money.
- The Grout Prism Liner consistently yield specimens with precise geometry and prevents specimens from adhering to block.

## CAT#: GPL

24 Grout Prism Liners

Also sold separately:

## CAT#: GPS

The Grout Prism Spacer keeps the GPL square and properly aligned while assembling block mold, while the thickness allows the specimen to be the corrected height. Manufactured from a rigid, non-absorbent plastic and is non-reactive to grout constituents. The Grout Prism Spacer is durable, reusable, and easy to clean. Packaged 4 per carton.

## CAT#: GPK

The Grout Prism Kit includes 24 grout prism liners and 4 grout prism spacer blocks.
