

HEAVY DUTY STEEL COLUMN FORMS

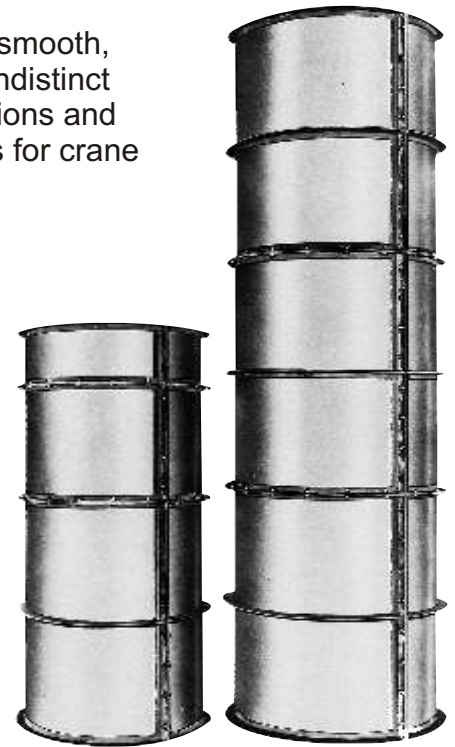

Deslauriers Heavy Duty Steel Column forms develop an exceptionally smooth, hard surface remarkably free of voids and with a minimum number of indistinct seams. The forms are galvanized constant radius steel half round sections and quarter round sections (for forms over 48" in diameter) bolted into units for crane handling on the jobsite.

- Larger sizes available; please call us.
- Steel Forms for sale or lease. New and used available.
- All standard column diameters from 14" to 60".
- Standard column lengths are 8'-0, 4'-0, 2'-0, and 1'-0.

TEMPERATURE DEGREES FAHRENHEIT	FT PER HOUR	
	2000 PSF	3000 PSF
40°	8 ft	13 ft
50°	10 ft	16 ft
60°	12 ft	20 ft
70°	14 ft	24 ft
80°	16 ft	26 ft
90°	18 ft	30 ft

Deslauriers forms used in "Bullnosing" application.

Lateral pressure should not exceed 3000 PSF on forms through 36" diameter or 2000 PSF on forms over 36" diameter.

CUSTOM STEEL FORMS

Deslauriers offers full in house engineering, design and fabricating services. We have manufactured concrete column forms for over 100 years. Let our experience and expertise help you meet your forming requirements to your exact specifications. Fax or e-mail your drawing for a quote.
