

PLASTIC DRILL TEMPLATE FOR PCF

THE PLASTIC DRILL TEMPLATE is a tool that helps the user of PCF drill holes into the horizontal flanges in a quick, easy and consistent manner for the purpose of adjoining PCF columns in a vertical fashion. This tool is simply an aide and is not necessary for the PCF to function properly.

These templates are laser cut from 1/8" stock polystyrene sheets. The holes are 9/16" diameter.

- Align ends of drilling fixture flush and even with vertical flange surface.
- Clamp drilling fixture to horizontal flange.
- Drill 9/16th holes using drilling fixture as guide.
