

# CONCRETE CUBE MOLD

6"x6"x6" (150mm)

Use the Deslauriers 6"x6"x6" **CUBE MOLD** to cast concrete compressive strength specimens or specimens for mortar penetration testing. This durable one-piece mold is constructed from heavy duty plastic and engineered with reinforcing ribs.

Provides consistent, quality test specimens.

Meets ASTM C403.

## REMOVE IN SECONDS!

Specimen removal is simple, fast and easy. Just remove the plug from the hole in the bottom of the mold and apply compressed air to the hole. The mold will slide right off the hardened specimen.

Check out our website to see a demo video!

To facilitate specimen removal, we suggest coating the inside of the mold with a film of releasing agent prior to each use.

**CAT#: 6EOC**
