# 3 GANG CUBE MOLDS

## ECON-O-CUBE MOLD (PLASTIC)

Casts 3 compression test cubes at one time in a diagonal arrangement. Mold and detachable base are held together by self-aligning thumb screws which ensure an even, tight fit. Mold and base are molded from an engineered plastic which resists cement, mortar, and mild acids. Provides accurate samples every time!

- Resuable
- Easy to clean
- Lightweight, only 2 lbs
- Separates into 3 pieces for ease of cleaning
- Molded to ASTM C109 dimensional tolerances

**CAT#: 2EOC**

## CUBE MOLD - STAINLESS STEEL OR BRASS

Accurately machined, this 3 Gang 2" x 2" cube mold makes 3 compression cubes at once. Mold casts cubes in a diagonal arrangement with a detachable base plate. Thumb screws secure halves tightly together. Large upper surface strike off area makes this mold a preferred choice.

Optional accessories include an all stainless steel fitted top (2EOC-COVER-SS), an all brass fitted top (2EOC-COVER-BR), and a brass cover plate (2EOC-COVER-CAP) designed to pour molten sulfur capping compound down through taper holes for testing compressive strength.

- Resuable
- Easy to clean
- Separates into 3 pieces for ease of cleaning
- Meets ASTM C109

**CAT#: 2EOC-SS**

**CAT#: 2EOC-Brass**
